THESE CAPSULES are superior to those made with Gelatine, inasmuch as their slow solubility preserves them entire until they have passed from the tenach into the testines, the usual nausea and unpleasant eructations being consequently avoided. From numerous medical testimonials, the patentees need only select the following, by William Acton, Esq. (see page 60 his celebrated Treatise):—"In many instances I have known the Gelatine Capsule burst in the effort of swallowing, or dissolve as soon as it is in the stomach. An improvement has lately been introduced by enclosing Combina in membrane, that obvicting many of the objections to all Gelatine Capsules." These Capsules may be had retail of all Chemists and Patent Medicine Vendors, and wholesale of Barclays, Edwards Sutton, Newbery, Sanger, and Butler, London.

CAMOMILE

THE MOST CERTAIN PRESERVER OF HEALTH:

AND, AS A NATURAL CONSEQUENCE, A

Purifier of the Blood & Sweetener of the whole System.

power of the digestive juices in the stomach to convert what we eat and drink into healthy matter, for the proper nourishment of the whole system. It is caused by everything which weakens the system in general, or the stomach in particular. From it proceed nearly all the diseases to which we are liable; for it is very certain that if we could always keep the stomach right, we should only die by old age or accident. Indigestion produces a great variety of unpleasant sensations; amongst the most prominent of its miserable effects are a want of or an inordinate appetite, sometimes attended with a constant craving for drink, a distension or feeling of enlargement of the stomach, flatulency, heartburn, pain in the stomach, acidity, unpleasant taste in the mouth, perhaps sickness, rumbling noise in the bowels. In some cases of depraved digestion there is by an agreeable change vanishes soon

Indigestion is a weakness or want of | nearly a complete disrelish for food; but still the appetite is not greatly impaired, as at the stated period of meals persons so afflicted can eat heartily, although without much gratification; a long train of nervous symptoms are also frequent attendants, general debility, great languidness. and incapacity for exertion. The minds of persons so afflicted frequently become irritable and desponding; great anxiety is observable in the countenance; they appear thoughtful, melancholy, and dejected, under great apprehension of some imaginary danger, will start at any unexpected noise or occurrence, and become so agitated that they require some time to calm and collect themselves. Yet for all this the mind is exhibarated without much difficulty; pleasing events, society, will for a time dissipate all appearance of disease; but the excitement produced

after the cause has gone by. Other symptoms are violent palpitations, restlessness, the sleep disturbed by frightful dreams and startings, and affording little or no refreshment: occasionally there is much moaning, with a sense of weight and oppression upon the chest, nightmare, &c.

It is almost impossible to enumerate all the symptoms of this first invader upon the constitution, as in a hundred cases of Indigestion there will probably be something peculiar to each; but be they what they may, they are all occasioned by the food becoming a burden rather than a support to the stomach; and in all its stages the medicine most wanted is that which will afford speedy and effectual assistance to the digestive organs, and give energy to the nervous and muscular systems. Nothing can more speedily, or with more certainty effect so desirable an object than Norton's Extract of Camomile Flowers. The herb has from time immemorial been highly esteemed in England as a grateful anodyne, imparting an aromatic bitter to the taste. and a pleasing degree of warmth and strength to the stomach, and in all cases of indigestion, gout in the stomach. windy colic, and general weakness, it has for ages been strongly recommended by the most eminent practitioners as very useful and beneficial. The great, indeed only objection, to its use has been the large quantity of water which it takes to dissolve a small part of the flowers, and which must be taken with it into the stomach. It requires a quarter of a pint of boiling water to dissolve the soluble portion of one drachm of Camomile Flowers: and when one or even two ounces may be taken with advantage, it must at once be seen how impossible it taking them; but, on the contrary, they is to take a proper dose of this wholesome herb in the form of tea; and the taken. After a long acquaintance with.

been placed the very first in rank of all restorative medicines is, that in taking it the stomach has always been loaded with water, which tends in a great measure to counteract, and very frequently wholly to destroy, the effect. It must be evident that loading a weak stomach with a large quantity of water merely for the purpose of conveying into it a small quantity of medicine must be injurious, and that the medicine must possess powerful renovating properties only to counteract the bad effects likely to be produced by the water. Generally speaking, this has been the case with Camomile Flowers, a herb possessing the highest restorative qualities, and, when properly taken, decidedly the most speedy restorer and the most certain

preserver of health.

NORTON'S CAMOMILE PILLS are prepared by a peculiar process, accidentally discovered, and known only to the proprietor, and which he firmly believes to be one of the most valuable modern discoveries in medicine, by which all the essential and extractive matter of more than an ounce of the flowers is concentrated in four moderate-sized pills. Experience has afforded the most ample proof that they possess all the fine aromatic and stomachic properties for which the herb has been esteemed, and as they are taken into the stomach unencumbered by any diluting or indigestible substance. in the same degree has their benefit been more immediate and decided. Mild in their operation and pleasant in their effect, they may be taken at any age and under any circumstance without danger or inconvenience. A person exposed to cold and wet a whole day or night, could not possibly receive any injury from would effectually prevent a cold being only reason why it has not long since and strict observance of, the medicinal

NORTON'S CAMOMILE PILLS (continued).

properties of Norton's Camomile Pills, it is only doing them justice to say that they are really the most valuable of all Tonic MEDICINES. By the word tonic is meant a medicine which gives strength to the stomach sufficient to digest in proper quantities all wholesome food; which increases the power of every nerve and muscle of the human body, or, in other words, invigorates the nervous and muscular systems. The solidity or firmness of the whole tissue of the body, which so quickly follows the use of Norton's Camomile Pills, their certain and speedy effects in repairing the partial dilapidations from time or intemperance, and their lasting salutary influence on the whole frame is most convincing, that in the smallest compass is contained the largest quantity of the tonic principle. of so peculiar a nature as to pervade the whole system, through which it diffuses health and strength sufficient to resist the formation of disease, and also to fortify the constitution against contagion. As such, their general use is strongly recommended as a preventative during the prevalence of malignant fever or other infectious diseases, and to persons attending sick-rooms they are invaluable. as in no one instance have they ever failed in preventing the taking of illness, even under the most trying circumstances.

As Norton's Camomile Pills are particularivi ecommended for all stomach complaints or indigestion, it will probably be expected that some advice should be given respecting diet, though after all that has been written upon the subject, after the publication of volume upon volume, after the country has, asit were, been inundated with practical essays on diet as a means of prolonging life, it would be unnecessary to say more, did we not feel it our duty to make the humble endeavour of inducing the public to regard them not, but to adopt

that course which is dictated by nature, by reason, and by common sense. Those persons who study the wholesomes, and are governed by the opinion of writers on diet, are uniformly both unhealthy in body and weak in mind. There can be no doubt that the palate is designed to inform us what is proper for the stomach, and of course that must best instruct us what food to take and what to avoid : we want ne other adviser. Nothing can be more clear than that those articles which are agreeable to the taste were by nature intended for our food and sustenance. whether liquid or solid, foreign or of native production; if they are pure and unadulterated, no harm need be dreaded by their use: they will only injure by abuse. Consequently, whatever the palate approves, eat and drink always in moderation, but never in excess; keeping in mind that the first process of digestion is performed in the mouth. the second in the stomach; and that, in order that the stomach may be able to do its work properly, it is requisite the first process should be well performed. This consists in masticating or chewing the solid food, so as to break down and separate the fibres and small substances of meat and vegetable, mixing them well, and blending the whole together before they are swallowed; and it is particularly urged upon all to take plenty of time to their meals and never eat in haste. If you conform to this short and simple, but comprehensive, advice, and find that there are various things which others eat and drink with pleasure and without inconvenience, and which would be pleasant to yourself only that they disagree, you may at once conclude that the fault is in the stomach, that it does not possess the power which it ought to do. that it wants assistance, and the sooner that assistance is afforded the better. A very short trial of this

NORTON'S CAMOMILE PILLS (continued).

put the stomach in a condition to perform with ease all the work which nature intended for it. By its use you will soon be able to enjoy, in moderation, whatever is agreeable to the taste, and unable to name one individual article of food which disagrees with or sits unpleasantly on the stomach. Never forget that a small meal well digested affords more nourishment to the system than a large one, even of the same food, when digested imperfectly. Let the dish be ever so delicious, ever so enticing a variety offered, the bottle ever so enchanting, never forget that temperance tends to preserve health, and that health is the soul of enjoyment. But should an impropriety be at any time, or ever so often, committed, by which the stomach becomes overloaded or disordered, render it immediate aid by taking a dose of Norton's Camomile Pills, which will so promptly assist in carrying off the burden thus imposed upon it that all will soon be right again.

It is most certainly true that every person in his lifetime consumes a quantity of noxious matter, which if taken at one meal would be fatal; it is these small quantities of noxious matter which are introduced into our food, either by accident or wilful adulteration, which we find so often upset the stomach, and not unfrequently lay the foundation of illness, and perhaps final ruination to health. To preserve the constitution, it should be our constant care, if possible, to coungract the effect of these

medicine will best prove how soon it will | small quantities of unwholesome matter: and whenever, in that way, an enemy to the constitution finds its way into the stomach, a friend should immediately be sent after it, which would prevent its mischievous effects, and expel it altogether. No better friend can be found-no, none which will perform the task with greater certainty-than NORTON'S CAMOMILE PILLS. And let it be observed that the longer this medicine is taken the less it will be wanted, and it can in no case become habitual, as its entire action is to give energy and force to the stomach, which is the spring of life, the source from which the whole frame draws its succour and support. After an excess of eating or drinking, and upon every occasion of the general health being at all disturbed, these PILLS should be immediately taken, as they will stop and eradicate disease at its commencement. Indeed, it is most confidently asserted, that by the timely use of this medicine only. and a common degree of caution, any person may enjoy all the comforts within his reach, may pass through life without an illness, and with the certainty of attaining a healthy OLD AGE.

On account of their volatile properties they must be kept in bottles; and if closely corked their qualities are neither impaired by time nor injured by any change of climate whatever. Price 131d. and 2s. 9d. each, with full directions. The large bottle contains the quantity

"The Royal Marine Hotel, Hastings, maintains the character it has enjoyed these Seventy years past, of being one of the quietest and costest Hotels in the Kingdom. Here the Visitor has all the comfort of a well ordered mansion, combined with the advantage of Hotel life, without the turmoil which too often accompanies the latter. These were doubtless the reasons why the Marine Hotel was selected by the Empress Eugenie and the latter Prince Imperial as their residence after Sedan. The Hotel has a South aspect, extensive views of the Channel, and is completely sheltered from North and North-east winds by the Cliff, on which the rulus of Hastings Castle stands The Cusine and the Wines, &c., are all that can be desired; and the personal attention of the Host and Hostess ensures to Visitors every home comfort."—The Whitehall Review, May 25th, 1882.
